CERTIFICATION

- Google Cloud Gen AI Leader Certification August 2026

PROFESSIONAL EXPERIENCE

GOOGLE
PRODUCT SOLUTIONS CONSULTANT, DISPLAY/DEMAND GEN (August 2025
2022–May 2026)

Product Launches & Testing (Readiness)

- Directed product launch readiness by designing and executing critical Customer User Journey (CUJ) testing for new features.
- Standardized pre-launch testing protocols, transitioning workflows to expand the testing pool and ensure comprehensive usability and relevancy audits prior to release.

Process Optimization & AI Automation (Foundry/Cases AI)

- Spearheaded AI and internal agent automation initiatives, defining signals and testing prototypes to significantly reduce agent Case Handling Time (CHT).
- Orchestrated a cross-functional strategic roadmap for case obviation within the Display & Demand Gen Product Area, identifying key user journeys to achieve an estimated 5% decrease in yearly support volume by the end of 2026.
- Transformed negative-growth segments into positive revenue generators by automating 15 specific CUJs per Product Area (PA) per quarter for self-service and agentic surfaces.

Data-Driven Analysis

- Executed quarterly 'hotspot' analyses on product bugs, cases, and customer escalations to systematically identify and address critical gaps across people, processes, and products. In Q4'25+Q1'26, achieved 5% reduction in case volumes by identifying a key issue for customer cases across markets, working with eng teams to launch a key feature and xfn teams to update customer communication
- Led a revenue protection program, developing and introducing proactive signals to identify risks, prevent revenue leakage, and scale best practices across multiple product areas.
- Managed core service delivery operations, establishing rigorous tracking for L1/L2 metrics across customer segments to quickly identify performance deviations and deploy effective turnaround plans.

Cross-Functional Leadership & Capability Development (Skilling)

- Overhauled Knowledge Management (KM) frameworks using internal AI tools to develop an end-to-end streamlined pipeline for upskilling Tier 1 Specialist Support teams to provide advanced campaign troubleshooting. Successfully piloted the program in the APAC region
- Piloted an AI tool by collaborating with the engineering team for continuously identifying gaps in Customer support documentation and using semantic

analysis to build a pipeline for updating internal and external Help Center content, leading to reduction in 2% QoQ decrease in customer support cases & 7% decrease in customer support agent man-hours

- Fostered global stakeholder alignment by leading monthly community clinics and establishing a robust feedback loop between segment POCs and management to proactively action customer pain points.

SENIOR SALES SPECIALIST, AGT (APR 2022–JULY 2025)

- **Awards:** Received recognition from India leadership for driving strong progress in customer satisfaction with ads policy.²³⁵
